■ Correct   ■ Wrong

Ques 1 : Which of the following statements are TRUE about the .NET CLR?

1. It provides a language-neutral development & execution environment.
2. It ensures that an application would not be able to access memory that it is not authorized to access.
3. It provides services to run "managed" applications.
4. The resources are garbage collected.
5. It provides services to run "unmanaged" applications.

Answer : 1, 2, 3, 4

Ques 2 : In data reader, what can be used before read method?

    (A) Getvalue
  ✖**(B)** Getstring
    (C) GetNumber
    (D) None
Answer : None

Ques 3 : What is ENUM?

    (A) It is used to initialize variables
  ✔**(B)** It is used to define constants
    (C) It is used to define variables
    (D) None
Answer : It is used to define constants

Ques 4 : A variable which is declared inside a method is called a_____variable

  ✔**(A)** Local
    (B) Private
    (C) Static
    (D) Serial
Answer : Local

Ques 5 : Can an Interface be instantiated directly?

  ✖**(A)** Yes
    (B) No
Answer : No

Ques 6 : Which of the following are valid .NET CLR JIT performance counters?

1. Total memory used for JIT compilation
2. Average memory used for JIT compilation
3. Number of methods that failed to compile with the standard JIT
4. Percentage of processor time spent performing JIT compilation
5. Percentage of memory currently dedicated for JIT compilation

Answer : 3, 4

Ques 7 : Automatic paging is possible in

    (A)   datareader
    (B)   dataset
    (C)   datatabel
  ✖**(D)**   all
    Answer :   datatabel

Ques 8 : What does Dispose method do with connection object?

    (A)   Close the connection
  ✖**(B)**   Temporary dispose the connection
    (C)   Deletes it from the memory
    (D)   All of the above
    Answer :   Deletes it from the memory

Ques 9 : Feature of a local variable

  ✔**(A)**   It must be declared within a method
    (B)   It represent a class object
    (C)   It can be used anywhere in the program
    (D)   It must accept a class
    Answer :   It must be declared within a method

Ques 10 : What is the Difference between Convert.ToInt32 and Int.Parse?

    (A)   Both are Same
    (B)   Convert.ToInt32 Can't Handle Null Values ,it will throws rgumentNullException error.
  ✔**(C)**   Int.Parse Can't Handle Null values , It will throws ArgumentNullException Error.
    (D)   Both can Handle Null Values
    Answer :   Int.Parse Can't Handle Null values , It will throws ArgumentNullException Error.

Ques 11 : Which of the following statements is correct about Managed Code?

  ✖**(A)**   Managed code is the code that runs on top of Windows.
    (B)   Managed code is the code that is written to target the services of the CLR.
    (C)   Managed code is the code where resources are Garbage Collected.
    (D)   Managed code is the code that is compiled by the JIT compilers.
    Answer :   Managed code is the code that is written to target the services of the CLR.

Ques 12 : What object can help you maintain data across users?

  ✖**(A)**   Session object
    (B)   Server Object
    (C)   Response Object
    (D)   Application Object
    Answer :   Application Object

Ques 13 : Is it possible to change the value of a variable while debugging a C# application?

✔**(A)** Yes
  (B) No
Answer : Yes

Ques 14 : Two methods with the same name but with different parameters.

✔**(A)** Overloading
  (B) Multiplexing
  (C) Duplexing
  (D) Loading
Answer : Overloading

Ques 15 : C# doesnot support:

  (A) abstraction
  (B) polymorphism
✔**(C)** multiple inheritance
  (D) inheritance
Answer : multiple inheritance

Ques 16 : Which of the following utilities can be used to compile managed assemblies into processor-specific native code?

Answer : ngen

Ques 17 : Which property will you use to process different server paths in a page?

  (A) Request
  (B) Response
✔**(C)** Server
  (D) Application
Answer : Server

Ques 18 : Are private class-level variables can inherited?

  (A) Yes, and we can access them
  (B) No, and we can not access them
  (C) Yes, but we can not access them
✖**(D)** All of the above are wrong
Answer : Yes, and we can access them

Ques 19 : Is there any errors in this -> EmployeeMgmt constructor: Public int EmployeeMgmt { emp_id = 100; }

✔**(A)** Return type
(B) Formal parameters
**(C)** No errors
(D) Name
Answer : Return type

Ques 20 : Which is true about Interface and abstract methods?

    (A) We can write only one abstract method inside interface.
    (B) No method is abstract inside interface
✔**(C)** All the methods inside Interface in an abstract method.
    (D) None of the above
    Answer : All the methods inside Interface in an abstract method.
